Profile

E-learning developer with hands-on experience designing interactive training modules using Articulate Storyline 360. Skilled in developing learner-focused interactions, implementing triggers, layers, and states, and integrating multimedia assets to enhance engagement. Experienced in publishing SCORM-compliant modules and deploying them to LMS platforms for corporate training delivery.

Work Experience

- A3Pixels** July 2025 - Present
Junior Software Developer
 - Develop interactive e-learning modules using Articulate Storyline 360 based on client requirements.
 - Implement complex learner interactions using triggers, layers, and states to control navigation and content flow.
 - Integrate multimedia assets such as images, icons, GIFs, and videos into learning modules.
 - Design interactive learning screens including hotspot interactions, scenario - based content, and knowledge checks to improve learner engagement and knowledge retention.
 - Configure navigation logic to guide learners through structured learning paths.
 - Publish and package modules as Scorm files and upload them to LMS platforms for testing and deployment.
 - Perform functionality testing to ensure smooth slide transitions, interactive behaviour, and user experience.

Technical Skills

- E-Learning Tools: Articulate Storyline 360, Articulate Rise 360, SCORM Publishing, LMS Deployment
- Interaction Design: Triggers, Layers, States, Hotspot Interactions, Sequential Navigation
- Multimedia Integration: Images, Icons, GIFs, Videos, Animations
- Web Technologies: HTML, CSS, JavaScript
- Other Tools: MS Excel, Adobe Photoshop(Basic)

Selected E-Learning Projects

- Gamified Interactive Learning Module**
 - Developed a multi-stage interactive training module using Articulate Storyline 360.
 - Designed a structured navigation screen with 8 sequential principle icons guiding learners through scenario-based interactions.
 - Created a gamified exploration section featuring 16 hotspot-based quiz interactions.
 - Implemented quiz logic with instant feedback and visual completion states for each hotspot.
 - Integrated client-provided multimedia assets including images, icons, GIFs, and videos to enhance learner engagement.
 - Published the module as a SCORM package and deployed it to an LMS, testing navigation flow and interaction performance.
- Interactive Learning Navigation Module**
 - Developed an interactive learning module with structured navigation allowing learners to explore multiple sections of training content.
 - Implemented menu-based navigation using triggers and states to track visited sections.
 - Designed content slides combining text, images, icons, GIFs, and videos.

- Ensured learners completed all sections before enabling the final completion screen.
 - Tested slide transitions, navigation flow, and multimedia loading to ensure a smooth learner experience.
-

Education

- **M.H. Saboo Siddik College of Engineering**
Bachelor of Engineering in Information Technology
8.86 CGPA

2023

Certifications

- AWS Cloud Foundations Certification (AWS Academy)
- AWS Introduction to Cloud Semester 1 (AWS Academy)
