

🎓 EDUCATION

Bachelor Of Computer Application 2019-08-01
Tilak Maharashtra University

Master Of Computer Application 2023-07-01
Chandigard University

🛠 TECHNICAL SKILLS

• **Testing Expertise**

Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Integration Testing, System Testing, UAT, Exploratory Testing

• **Testing Tools**

JIRA, Bugzilla, TestRail, Postman, Selenium (Basic), Apache JMeter (Basic)

• **Test Artifacts**

Test Cases, Test Scenarios, Test Plan, RTM, Bug Reports, Test Summary Reports

• **API Testing**

REST APIs, Postman, JSON, HTTP Methods (GET, POST, PUT, DELETE)

• **Databases**

MySQL (SQL Queries), Oracle

• **Development & Tools**

Git, GitHub, Chrome DevTools, MS Excel, Google Sheets

• **Methodologies**

SDLC, STLC, Agile (Scrum), Waterfall, V-Model

• **Platforms**

Web Application Testing, Mobile Testing (Android), Cross-Browser Testing

📜 CERTIFICATIONS

- Google IT Support Professional - Coursera

📄 SUMMARY

Detail-oriented **Software Test Engineer** with 2+ years of hands-on experience in manual testing, API testing, and quality assurance of web applications. Skilled in designing and executing test cases, defect tracking, and validating end-to-end business workflows. Proficient in tools like JIRA, Postman, and SQL, with a strong understanding of SDLC, STLC, and Agile methodologies. Proven ability to identify critical defects, improve product quality, and collaborate effectively with development teams.

🏢 EXPERIENCE

Software Test Engineer (Manual Testing) 06/22 – Now
Guru Nanak College

- Performed **manual testing on web-based applications**, ensuring functionality, usability, and performance met business requirements
- Designed and executed **200+ test cases and test scenarios** covering critical workflows and edge cases
- Identified, logged, and tracked **50+ defects** using JIRA, ensuring proper defect lifecycle management
- Conducted **API testing using Postman**, validating request/response, status codes, and data accuracy
- Executed **regression and smoke testing cycles** to ensure stability after bug fixes and new releases
- Wrote SQL queries for **backend data validation and verification**
- Collaborated with developers to **analyze defects and ensure timely resolution**
- Applied Agile methodology concepts, including sprint-based testing and test planning
- Reviewed and improved test documentation (RTM, test cases) to align with industry QA standards

<> PROJECTS

E-Commerce Web Application Testing

- Conducted **end-to-end testing** for modules: Login, Product Search, Cart, Payment, Order Management
- Created **120+ test cases**, ensuring maximum functional coverage
- Performed **API testing using Postman** for cart and order workflows
- Logged and tracked defects using JIRA
- Validated UI and backend data using Chrome DevTools and SQL

Tools: JIRA, Postman, MySQL, Chrome DevTools

Banking Application Testing

- Tested modules: Account Creation, Fund Transfer, Loan Processing, Statements
- Designed **Requirement Traceability Matrix (RTM)** for complete test coverage
- Identified **40+ critical defects**, improving system reliability
- Performed **regression testing** after bug fixes

Tools: TestRail, Bugzilla, SQL
