Summary

Dynamic and Motivated Software Test Engineer with Proficient knowledge in Manual Testing, Defect Tracking & Reporting, and Database Management Systems. A highly organized and Hard-working Individual looking to secure employment with a reputable company, to expand my software knowledge and skills, while making a significant contribution to the success of the company.

Software Skills

- Excellent knowledge of Manual Testing.
- Proficient Knowledge of Test Case Design Techniques, SDLC, STLC, and Defect Life Cycle.
- Proficient in analysing Functional Requirements and Translating them to Test Cases.
- Hands-on knowledge of Writing & Executing Test Cases in TestRail.
- Experienced in Logging Defects and Tracking Defects in Mantis BT & JIRA.
- Clear understanding of Agile Methodology - SDLC phases

Technical Skills

- Test Management Tools: Excel, TestRail
- Defect Tracking Tool: JIRA, Mantis BT
- Database: MYSQL

Project Details

Name: Furniture (E-Commerce)

Platform: Web Application

Description: Furniture is an E-commerce website that allows people to buy physical goods and products. It's a B2C website designed on Magento Framework.

- Created comprehensive test cases based on business scenarios in the Excel sheet and later translated them into TestRail for ease of maintenance.
- Thoroughly Executed test cases and conducted manual testing of the application to ensure the functionality, usability, and compatibility of various features.
- Identified and documented defects in MantisBT.
- Maintained comprehensive testing record by preparing test plan, test cases, traceability matrix, and test execution report.

Academic Project

Title: Voice Controlled Robot Using Android App

In this project build a voice-controlled robot that can be controlled by voice commands which will react in accordance to the corresponding voice commands. Simple voice commands like left, right, forward, back, lift, drop, move, etc will be used to run the robot. The robotic arms attached to the robot will ensure that all the tasks are performed by the robot as commanded by the controller. The aim of this project is to develop a robot which is easily controlled by simple voice commands and which is able to perform different tasks without any hesitation. The human intervention is limited only till voice commands through an android app.

Education

B.E (Electronics Engineering)	MH SABOO SIDDIK COLLEGE OF ENGINEERING	2022
Diploma (Electronics Engineering)	Thakur Polytechnic	2019
HSC	Valia Junior College of Science, commerce and arts	2016
SSC	Bhavans AH Wadia High School	2014

Internship (May 2024 – October 2024)

Permanent (October – Present)

Company: Testriq QA LAB, LLP.

Role : Manual Software Tester(Intern).

Department/Team: Quality Assurance/Software Testing.

Current Projects Name : CANVA, MyStylist Partner and Customer Application

Platform : Web Application/Android/IOS app

Browsers : Chrome, Firefox, Safari and Microsoft Edge.

Project #1 : Canva

Tools and Technologies used : Cucumber Studio , JIRA
