PROFESSIONAL SUMMARY

Fresher Software Engineer and 2024 Computer Science graduate specializing in Artificial Intelligence and Machine Learning. Strong foundation in Java, SQL, DBMS, and object-oriented programming with hands-on experience in building end-to-end applications and data-driven machine learning solutions. Demonstrated leadership through academic roles and published research, with a proven ability to learn quickly, solve problems, and collaborate effectively in team environments.

CORE TECHNICAL SKILLS

- Programming Languages: Java (Advanced), Python (Intermediate)
 - Databases & Querying: SQL, MySQL, SQL Server (Advanced)
 - Frameworks & Tools: Spring Boot (Beginner), Django (Intermediate), Git, GitHub, JDBC
 - Data & Analytics: Machine Learning, Pandas, NumPy, Scikit-learn, Excel (Advanced), Power BI (Beginner)
 - Web Technologies: HTML, CSS
 - Computer Science Fundamentals: DBMS, OOPs, Data Structures & Algorithms (Beginner)
-

ACADEMIC & TECHNICAL PROJECTS

Student Management System | Java, Spring Boot, MySQL, JDBC, GitHub

- Designed and developed an individual full-stack Student Management System to manage academic records efficiently.
- Implemented secure authentication and authorization mechanisms to control application access.
- Built complete CRUD functionality for student information using optimized SQL queries and JDBC connectivity.

- Designed and maintained relational database schema ensuring data consistency and integrity.
- Developed reusable backend components following object-oriented and layered architecture principles.
- Version-controlled the complete application using Git and published the project on GitHub.

Medicare Fraud Detection using Machine Learning | Python, Scikit-learn, Pandas, Matplotlib

- Developed a machine learning model to detect fraudulent Medicare claims using real-world Kaggle datasets.
- Performed extensive data cleaning, preprocessing, and exploratory data analysis to identify fraud patterns.
- Implemented and evaluated Random Forest and Logistic Regression models for binary classification.
- Measured model performance using accuracy, precision, and recall metrics to ensure reliability.
- Created insightful visualizations to communicate trends and anomalies effectively to stakeholders.
- Research findings were formally published in IJIRT (International Journal of Innovative Research in Technology).

Monthly Expense Budget Tracker | MS Excel

- Designed and developed an Excel-based budgeting system to track monthly income and expenses.
- Categorized expenses such as rent, utilities, food, transportation, and miscellaneous spending.
- Used Excel functions including SUM, IF, and SUMIFS to automate expense calculations.
- Performed Budget vs Actual analysis to identify overspending and savings opportunities.
- Created charts and visual summaries to analyze spending trends clearly and effectively.
- Implemented conditional formatting to highlight expenses exceeding allocated budgets.

EDUCATION

B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning) — 2024
Sphoorthy Engineering College
CGPA: 7.15 | Merit Student

Intermediate (XII), Sri Chaitanya Junior College — 2020 | Percentage: 88%

SSC (X), Dr. RLR High School — 2018 | CGPA: 8.8

PUBLICATIONS

- Medicare Fraud Detection using Machine Learning – Published in IJIRT (International Journal of Innovative Research in Technology).
-

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Served as Class Representative for two academic years, acting as a liaison between faculty and students.
 - Led academic project teams, ensuring timely delivery and effective task delegation.
 - Organized and coordinated technical and cultural college fests and events.
 - Demonstrated strong communication, leadership, and organizational skills through student engagement initiatives.
-

CERTIFICATIONS

- Machine Learning and Artificial Intelligence – Udemy
- Java Full Stack Development – Quality Thought
- Python Programming – Code Tantra
- Virtual AIML Internship – AICTE Eduskills
- Generative AI – Outskill
